DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims **1-5**, drawn to a spherical golf ball, classified in class 473, subclass 278.
- II. Claims **6-8**, drawn to method for fabricating a golf ball, classified in class 473, subclass 409.

The inventions are distinct, each from the other because:

Inventions I and II are related as apparatus and method. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the process for using the product as claimed can be practiced with another materially different product. For example, the process as claimed could be used to fabricate a golf ball that has different size of groove or depth other than what is claimed in claim 1.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
